Subject: Proposed Data Center(s) in Callaway County MO

Gentlemen,

I am a resident of Fulton and writing to formally express my opposition to the proposed data center project in Callaway County.

While I support economic development, I believe AI data centers and similar business projects present significant risks to our community that must be properly mitigated.

My concerns include:

1. **Environmental Impact:** The potential for excessive water consumption and noise pollution from cooling systems and generators.
2. **Grid Reliability:** The immense energy demands could cause utility rates to rise for local residents.
3. **Land Use:** This project does not align with the rural/residential character of our area, disrupting agricultural land and local wildlife.

While these facilities provide tax revenue, they are intense industrial users that require careful regulation to be "good neighbors".

At minimum, I urge the commission to institute a moratorium to conduct a comprehensive impact study before approving any such project.
