Callaway County Clerk's Office

Request for Records Form

This is a request for under the Missouri Sunshine Law, Chapter 610, Revised Statutes of Missouri.

NAME: <u>Ariel Meranda</u>	PHONE: <u>573-590-4319</u>	EMAIL: <u>ahelmeranda@gmail.com</u>
ADDRESS: <u>1004 Sharon Dr Fulton MO, 65251</u>		

I request that you make available to me the following records:

(Please describe the records as specifically as possible. Where you are asking for records that cover only a particular period, such as last year or a specific month, identify the time period.) January 1st 2024 until present. All current County Commissioners as well as city seats. Emails, texts, and any agreement or payment mentioning Cruise, Project Code Name, large load, large load customer, hyperscaler, mission critical facility, advanced manufacturing facility, industrial user, economic development project, confidential project, data center campus, server farm.

If you know the subject matter of the records, but do not have additional information, use this alternative: I request that you make available to me all records that relate to:

(Be as specific as possible; include dates if you can.)

If you want copies of the records and are willing to pay for them, rather than just being able to view them, then:

I request that the records responsive to my request be copied and sent to me at the following address:

ADDRESS:

☒ SAME AS ABOVE

If you believe your request serves the public interest, and is not just for personal or commercial interest, you may ask that the fees be waived:

I Request that all fees for locating and copying the records be waived. The information I obtain through this request will be used to:

(Tell how you will use the information and why that use is in the public interest.) This information is important for citizens as we have the right to remain informed on potential health hazards in our community. These documents will allow us insight on the stance of our commissioners as well as who is trying to build in our county.

Please let me know in advance of any search or copying fees will exceed \$ 50.00.
(Insert amount you are willing to pay without additional information about the documents.)

If portions of the requested documents are closed, please segregate the closed portions and provide me with the rest of the records.

Ariel Meranda
Signature Date 7-6-2026

Subject: Re: Response to Sunshine Law Request Dated July 6, 2026

I approve these charges

On Fri, Jul 10, 2026 at 1:37 PM Callaway Commission <comish@callawaycounty.org> wrote:

Dear Ms. Meranda,

This email is in response to your Sunshine Law request dated July 6, 2026, regarding records related to data center developments and associated agreements.

The Callaway County Commission Office is currently reviewing your request and identifying records that may be responsive. Based on our preliminary assessment, we estimate the cost of fulfilling your request as follows:

- Copies: approximately \$0.10 per page
- Research time: approximately \$70 (based on an estimated 3.5 hours of staff time performed by the lowest-paid qualified employee)

Estimated total: Approximately \$70 in research costs, plus \$0.10 per page for any copies provided.

Please note that this amount is **only an estimate**. The final cost may be higher or lower depending on the actual number of responsive records located, the time required to search for, review, and compile those records, and the number of pages produced.

No research, record collection, review, or production work will begin until we receive your written approval of this estimated cost. If you wish to proceed, please reply to this email stating that you approve the estimated charges.

Once we receive your approval, staff will begin the research and records-gathering process. Please be advised that this work will be completed as staff time permits and must be balanced with the employee's regular job responsibilities. Accordingly, the request will not be completed in a single day, and repeated emails requesting status updates will not accelerate the process.

When the records have been gathered and are ready, you will be notified by email. At that time, payment will be due to the Callaway County Treasurer, and the records may be picked up at the Callaway County Treasurer's Office, 10 East 5th Street, Room 106, Fulton, MO 65251.

Again, the research time and associated costs outlined above are estimates only and may change based on the actual work required to fulfill your request.

Thank you for your attention to this matter. We look forward to your response regarding approval of the estimated costs.

Sincerely,

Callaway County Commission Office
Callaway County, Missouri

Urgent Concerns Regarding Proposed Data Center in Callaway County MO

From Sandy Bond <sandybond1770@yahoo.com>

Date Mon 2026-05-25 4:44 AM

To Curt Warfield <cwarfield@callawaycounty.org>

Dear Commissioner Curt Warfield, I am a resident of Callaway County and I am writing to formally express my opposition to the proposed data center project in Callaway County. While I support economic development, I believe this specific project poses significant risks to our community. My concerns include: 1. Environmental Impact: The potential for excessive water consumption and noise pollution from cooling systems and generators. 2. Grid Reliability: The immense energy demands could cause utility rates to rise for local residents. 3. Land Use: This project does not align with the rural/residential character of our area, disrupting agricultural land and local wildlife. While these facilities provide tax revenue, they are intense industrial users that require careful regulation to be "good neighbors". At a minimum, please consider the following when evaluating new proposals: *

- * Mandating noise mitigation: Restricting chiller operations to meet noise limits at property lines.
- * Environmental Protection: Prohibiting projects in floodplains or areas with high water tables, and regulating water and electric usage such that it does not impact the availability or costs of these basic utilities for the citizens of the surrounding communities.
- * Thermal Pollution Study: Evaluating the impact of "heat domes" on surrounding agriculture.

I urge the commission to reject this proposal or, at minimum, institute a moratorium to conduct a comprehensive impact study. Sincerely, Sandra Bond

Date Mon 5/18/2026 12:55 PM

Dear Callaway County,

I'm a 10 year resident and home owner of Fulton, Missouri, and I wanted to formally express my concerns regarding the proposed data center project in Callaway County unless meaningful protections are put in place for the surrounding community first.

I'm not against growth or economic development. I understand projects like this can bring tax revenue and attention to the area. But AI data centers are not small, quiet operations. They are massive industrial facilities with equally massive demands on power, water, infrastructure, and the environment. I believe those impacts deserve serious review before anything moves forward.

Some of my biggest concerns are:

Environmental impact

These facilities consume enormous amounts of water and generate constant industrial noise from cooling systems, generators, and infrastructure. That affects nearby residents, farmland, and wildlife.

Utility strain and rising costs

The energy demand required to support large scale AI operations is significant. I worry local residents could ultimately feel that burden through higher utility costs or grid reliability issues.

Rural land use and community character

Callaway County is made up of agricultural land, open space, and rural communities. Projects of this scale fundamentally change the landscape and should be evaluated with that in mind.

If projects like this are going to move forward, I strongly encourage the county to require safeguards that ensure these companies operate as responsible neighbors, not unchecked industrial users.

At minimum, I would ask the commission to consider:

- Strict noise mitigation requirements with enforceable limits at property lines
- Protections against excessive water and electrical usage that could impact residents
- Restrictions on building in floodplains or environmentally sensitive areas
- Independent studies on thermal pollution and potential "heat dome" impacts on surrounding agriculture and ecosystems

Most importantly, I urge the commission to place a temporary moratorium on approval until a comprehensive environmental and infrastructure impact study can be completed and reviewed publicly.

I appreciate your time and consideration, and I hope the long term well being of Callaway County residents remains the priority in decisions like these.

Sincerely,

Amanda Bowlds

Subject: Hello

Hello,

I am a citizen of Callaway County asking for a moratorium ordinance and insist that our county commissioners deny any and all types of tax abatement to ANY data center corporation. At the very least you owe the citizens that you serve a real chance to ask very serious questions and concerns. And, no, I do not feel what Crusoer put on was any actual real explanation for their unsavory actions. For example, everyone, even Crusoer and sitting County commissioners seem to be completely ignoring the very real concerns and permanent damage that these hyperscale data centers are already causing in other locations across the country. I keep asking why nobody will discuss the severe repercussions that come with the use of a closed loop cooling system? Anytime I mention PFAS chemicals (forever TOXIC chemicals) people even from Crusoer act ignorant. But the PFAS chemicals are used in the closed loop cooling system. So if they truly understand the system they're discussing then they know the very real hazards. Just the sound damage alone is very concerning. If the county commissioners truly have nothing to hide then please setup a public meeting place where citizens can voice real questions and and concerns. If you're going to sell the county citizens out and permanently damage air, sound, land and drinking water for multiple generations then just have the common decency to tell us to our faces and allow us to ask why you all had been doing this in secret? Would any of you told us county citizens of this hyperscale Ai data center if it had not gotten leaked? Thank you for your time

Cassandra,

Thank you for your recent emails. I appreciate your concerns over the pending development of a data center in Callaway County. The Commission shares your concerns and is actively discussing all concerns gathered from constituents with the developer.

As for a public meeting, that is exactly why the Chamber of Commerce and Crusoe put on the open house event. Because that event was not a commission-sponsored meeting does not mean that the commission is operating in private. The commission has been very open to meet for discussions of public concerns. Two recent such meetings (Monday 7/27 and Wednesday 7/29) were recorded as official Commission business, and those recordings are available from the County Clerk website along with all other Commission meetings.

https://callawaycountyclerk.com/?page_id=20969

The idea that the County MUST hold a meeting similar to the public open house already held seems to indicate that the public would treat the same information to a greater degree if it were delivered by the Commission, rather than from the developer and the local Chamber of Commerce. On that point, I believe that we will have to agree to disagree. Folks are going to tend to trust only the information with which they agree most, not the same information delivered from a different source. The information is the information... and the best information is that delivered from the developer... which has been publicly delivered and reported by many local media outlets.

The Commission has been and will continue to be open for public discussions. As always, if you would like to discuss further, I would welcome either a telephone discussion or an in-person chat. My contact info is all available in the email signature below.

So if they truly understand the system they're discussing then they know the very real hazards. Just the sound damage alone is very concerning. If the county commissioners truly have nothing to hide then please setup a public meeting place where citizens can voice real questions and and concerns. If you're going to sell the county citizens out and permanently damage air, sound, land and drinking water for multiple generations then just have the common decency to tell us to our faces and allow us to ask why you all had been doing this in secret? Would any of you told us county citizens of this hyperscale Ai data center if it had not gotten leaked? Thank you for your time

Cassandra,

Thank you for your recent emails. I appreciate your concerns over the pending development of a data center in Callaway County. The Commission shares your concerns and is actively discussing all concerns gathered from constituents with the developer.

As for a public meeting, that is exactly why the Chamber of Commerce and Crusoe put on the open house event. Because that event was not a commission-sponsored meeting does not mean that the commission is operating in private. The commission has been very open to meet for discussions of public concerns. Two recent such meetings (Monday 7/27 and Wednesday 7/29) were recorded as official Commission business, and those recordings are available from the County Clerk website along with all other Commission meetings.

https://callawaycountyclerk.com/?page_id=20969

The idea that the County MUST hold a meeting similar to the public open house already held seems to indicate that the public would treat the same information to a greater degree if it were delivered by the Commission, rather than from the developer and the local Chamber of Commerce. On that point, I believe that we will have to agree to disagree. Folks are going to tend to trust only the information with which they agree most, not the same information delivered from a different source. The information is the information... and the best information is that delivered from the developer... which has been publicly delivered and reported by many local media outlets.

The Commission has been and will continue to be open for public discussions. As always, if you would like to discuss further, I would welcome either a telephone discussion or an in-person chat. My contact info is all available in the email signature below.
