
Urgent Call for Accountability: Protecting Callaway County Taxpayers and Land from Data Center Development

From Englassed musetech <yvette.musetech@gmail.com>

Date Sat 2026-05-23 1:12 PM

To Jim.Schulte@house.mo.gov <Jim.Schulte@house.mo.gov>; Gary Jungermann <GJungermann@Callawaycounty.org>; Christopher Scott <cscott@callawaycounty.org>; Curt Warfield <cwarfield@callawaycounty.org>

Dear Commissioner Jungermann and all the people addressed in this message,

As a resident and taxpayer of Callaway County, I am writing to you directly to express my deep concerns and formal opposition to the proposed data center project in our county, unless stringent, legally binding protections for our community are established first.

While economic growth is important, it should never come at the expense of the people who live here, pay taxes here, and tend to this land. AI data centers are not standard commercial developments; they are massive industrial operations disguised as tech offices. I urge you to look beyond the promised tax revenues and weigh the permanent, irreversible impacts this facility will have on our county.

I ask that you carefully consider the following critical impacts before moving forward:

Erosion of Our Rural Heritage and Beautiful Land: Callaway County is defined by its agricultural strength, open spaces, and natural beauty. Dropping a massive, industrial data center complex into our landscape fundamentally disrupts the rural character of our area, harms local wildlife corridors, and fragments productive agricultural land. Once this beautiful land is cleared and industrialized, we can never get it back.

The Burden on Local Taxpayers: We need concrete guarantees that local residents will not foot the bill for the immense infrastructure upgrades these facilities require. The massive energy and water demands of data centers frequently lead to rising utility rates for local citizens and put an unprecedented strain on our electric grid. Taxpayers should not see their hard-earned money used to subsidize corporate utilities while risking blackouts or rate hikes.

Severe Environmental and Resource Strain: The cooling systems required for these centers consume millions of gallons of water daily, threatening our local water tables. Furthermore, the constant, low-frequency hum of industrial chillers and massive backup generators creates a permanent radius of noise pollution that shatters the peace of rural residential life.

As our Presiding Commissioner, your first duty is to safeguard the well-being of Callaway County's citizens and land. At a bare minimum, I urge the Commission to institute an immediate moratorium on approvals to conduct an independent, comprehensive impact study. We must mandate strict property-line noise mitigation, prohibit building in sensitive environmental areas or floodplains, and require thermal pollution studies to ensure these facilities do not create localized "heat domes" that damage surrounding crops.

The taxpayers of Callaway County are watching this decision closely. We expect our elected leaders to protect our resources, our pocketbooks, and our way of life.

Thank you for your time, your leadership, and your attention to this critical matter. I look forward to your response.

Sincerely,

Yvette English

406 E. Harrison St
Auxvasse, MO 65231

To Caryne Gordon <carynebowyer@gmail.com>

Caryne,

As your Western District Commissioner, I appreciate your email expressing your concerns over the data center discussions in Callaway County. Your passion was clearly communicated through your email.

While I work to stay educated on current topics as your County leader, I always wish to temper the industry chatter with local input. The data center topic is one of the latest - and one of the loudest - topics being discussed today in Callaway County and in our neighboring counties.

As your elected commissioners, we are tasked with making the best of the situation. However, we will enter the county into a great deal of legal jeopardy with any attempt to limit who and what business can be conducted in our county.

I do greatly appreciate your list of suggested considerations including noise abatement, environmental protection, and thermal pollution.

I appreciate you taking the time to send your email. Please know that you have been heard. If you would like to discuss further, I would welcome either a telephone discussion or an in-person chat. My contact info is all available in the email signature below.

Subject: Urgent Concerns Regarding Proposed Data Center in Callaway County MO

Dear Christopher Scott,

I am a resident of Fulton and I am writing to formally express my opposition to the proposed data center project in Callaway County.

While I support economic development, I believe this specific project poses significant risks to our community.

My concerns include:

1. Environmental Impact: The potential for excessive water consumption and noise pollution from cooling systems and generators.
2. Grid Reliability: The immense energy demands could cause utility rates to rise for local residents.
3. Land Use: This project does not align with the rural/residential character of our area, disrupting agricultural land and local wildlife.

While these facilities provide tax revenue, they are intense industrial users that require careful regulation to be "good neighbors". At a minimum, please consider the following when evaluating new proposals:

- * Mandating noise mitigation: Restricting chiller operations to meet noise limits at property lines.
- * Environmental Protection: Prohibiting projects in floodplains or areas with high water tables, and regulating water and electric usage such that it does not impact the availability or costs of these basic utilities for the citizens of the surrounding communities.
- * Thermal Pollution Study: Evaluating the impact of "heat domes" on surrounding agriculture.

I urge the commission to reject this proposal or, at minimum, institute a moratorium to conduct a comprehensive impact study.

Sincerely,
Caryne Gordon

To Curt Warfield <cwarfield@callawaycounty.org>

Dear Commissioner Warfield,

I am a resident of Holts Summit and I am writing to formally express my opposition to the proposed data center project in Callaway County, unless proper protections for the community are in place.

While I support economic development, I believe AI data centers and similar business projects present significant risks to our community that must be properly mitigated.

My concerns include:

1. Environmental Impact: The potential for excessive water consumption and noise pollution from cooling systems and generators.
2. Grid Reliability: The immense energy demands could cause utility rates to rise for local residents.
3. Land Use: This project does not align with the rural/residential character of our area, disrupting agricultural land and local wildlife.
