Subject: Re: Updated Tax Revenue Projections - 336 MW IT

Hi Christopher -

Happy to walk through the calculations and assumptions made to arrive at the tax revenue estimates. We used a 336 MW IT build for the model I sent. The previous version was for our standard 204 MW IT building. The updated larger build will assume a total gross power of 470 MW (relative to our 500MW ESA).

Let me know if one of the times listed in my previous email works for a quick chat to talk through the details of the spreadsheet.

Thanks

That would be very helpful... along with an understanding of the calculations. You changed to MW basis. How was that translated from tax dollars to MW? What date per MW was used in the calculations?

Hi Commissioners -

Happy Monday! I hope you all had a nice weekend. Please find attached the updated tax revenue projections. Due to the urgency, we based the estimates on a 336 MW IT building (slightly smaller than the 350 MW IT) and used a conservative approach. Underpromise and overdeliver! Below are a few callouts I wanted to highlight. Please take a look and let me know if you have any questions.

TOTAL TAX REVENUE	4,128,335,749
25 year average annual tax revenue	123,028,150
Post abatement average annual tax revenue	236,159,083
Annual increase to County's budget	46%
Annual increase to School District's budget	658%
ASSUMPTIONS	
Ambulance and Fire District will opt out of Chp 100	
25 year term - 0% real / 85% personal abatement
